CISS240: Introduction to Programming
Quiz q1202

Name: _____   Score: [   ]

This is a closed-book, no C++ compiler, 5-minute quiz.

Q1. Write a program that continually get an integer from the user prints `zero` if the input is `0`, prints `unit` is the input is `1`, otherwise it prints `prime` if the input is a prime number or it prints `not prime` if the input is not prime. If the user enters a negative number the program prints `error`. To stop the loop and ends the program, the user enters `-1`. Sample test run:

```
0
zero
1
unit
2
prime
3
prime
4
not prime
-5
error
-1
```
