CISS240: Introduction to Programming
Quiz q0103

Name: _____   Score: _____

This is a closed-book, no C++ compiler, 2-minute quiz.

Q1. For each line, identify the type of the value shown by writing S for string, C for character, and N for neither.

```
(a) "#include <iostream>"     □
(b) '!'                        □
(c) 'hello world'             □
(d) "42"                       □
(e) "hello world             □
```

Q2. T or F or M. ....□
When you run this program:

```cpp
#include <iostream>

int main()
{
    std::cout << "the answer to life, universe, and everything is 42\n";

    return 0;
}
```

you will see the following output on your console window:

```
the answer to life, universe, and everything is 42\n
```

Q3. The string "g\tr\te\te\tn" has a length of □

Q4. T or F or M. ....□
The output of the following program

```
#include <iostream>

int main()
{
    std::cout << "_t/\t_\n";

    return 0;
}
```

is

```
_t/\t_
```

Q5. Complete the program by printing ONE string so that it produces the given below:

```
#include <iostream>

int main()
{
    std::cout << _____;

    return 0;
}
```

Intended output:

```
1
2
3
```

ANSWER:
